

Sectors in focus

During the State Visit, the business delegation will offer its participants a range of seminars, meetings, and events under the theme "Ghana – an Emerging Market within Reach". These activities will primarily focus on the three sectors below, where Denmark has key strengths and there has been identified a Ghanaian demand for Danish products and services. The final programme will be adjusted according to the profile and interests of the delegation. Participation is primarily relevant to companies that already have or are actively seeking commercial activities in Ghana.
